

# AGRO SHREY GLOBAL IMPEX COMPANY

*“Passion, Patience & Persistence are the 3 P’s of our company to win the confidence of our customers”.*

## PRODUCT PROFILE SPECIALLY DESIGN FOR GLOBAL MARKETS

### BASMATI RICE:

**About Basmati Rice** - Basmati” is long grain aromatic rice grown for many centuries in a specific geographical areas of Haryana ,Punjab, Madhya Pradesh, Uttar Pradesh and in the Himalayan foothills of the Indian sub-continent, blessed with characteristics of extra-long slender grains that elongate at least twice their original size with a characteristics soft and fluffy texture upon cooking.

Agro shrey presence – Madhya Pradesh, Uttar Pradesh and Haryana.

### Types of Basmati Rice for export –

- 1) 1121 basmati white sella (parboiled), Golden sella and steam.
- 2) 1718 basmati rice white sella (parboiled), golden sella and steam.
- 3) 1509 basmati rice white sella (parboiled), Golden sella and steam.
- 4) 1401 basmati rice white sella(parboiled), golden sella and steam.
- 5) Organic Basmati Rice is also available in all the above categories

### CHARACTERISTICS:

Some of the major characteristics of Basmati rice which has captivated the world with its irresistible qualities are:

Colour – Basmati rice has a distinct translucent, almost pearly creamy white colour. Although brown Basmati rice is also produced, the white polished variety is better preferred over it.

Grain – Basmati rice is known to have long and slender grains. This forms one of the key characteristics for its recognition.

Shape – Another factor for identification of basmati rice is its unique shape. The length to breadth ratio of basmati rice grain is equal to or more than three is to one and has a delicate curvature.

Texture – Basmati rice grains have a silky texture and the grains are firm, separate and dry. Upon cooking the grains remain separate and become fluffy.

Elongation – Basmati rice grains upon cooking elongate to nearly or more than double the length of the uncooked grain with minimal or no fattening.

Fragrance – Basmati rice is famous for its unique and enticingly supreme aroma even in the uncooked state.

Flavour – The grains of basmati rice boast of a rich appetizing flavour. The delectable taste of the basmati rice is an extremely magnificently delicate blend of nutty and sweet flavours.

### NON BASMATI RICE:

**ABOUT NON BASMATI RICE- IR 64 5% BROKEN** Rice Variety: IR64 is a highly popular variety of rice known for its high-yield potential and good cooking qualities. It is widely cultivated in many rice-producing regions. /Broken Grain Percentage: 5% /Usage: Parboiled rice, including IR64 parboiled rice, is suitable for a wide range of culinary applications. It can be used for cooking various rice dishes such as biryanis, pilafs, fried rice, and more. Parboiled rice is known for its ability to retain its shape and separate the grains after cooking. /Quality: The 5% broken specification indicates that the product has a high level of intact grains, which is considered desirable for certain culinary uses. However, the broken percentage can affect the price and potential uses of the rice, as broken grains are sometimes used in specific food preparations or as an ingredient in other products.

*IR 64 Parboiled rice is the highest sellable rice to Africa from India.*

**Agro Shrey Presence-** Chhattisgarh (Rice Bowl of India), Madhya Pradesh and Uttar Pradesh all 3 States are popular for quality Agriculture commodities.

## WHEAT FLOUR AND REFINED WHEAT FLOUR:

### About Wheat

Wheat is the main cereal crop in India. The total area under the crop is about 29.8 million hectares in the country. The production of wheat in the country has increased significantly from 75.81 million MT in 2006-07 to an all time record high of 94.88 million MT in 2011-12. The productivity of wheat which was 2602 kg/hectare in 2004-05 has

# AGRO SHREY GLOBAL IMPEX COMPANY

increased to 3140 kg/hectare in 2011-12. The major increase in the productivity of wheat has been observed in the states of Haryana, Punjab and Uttar Pradesh. Higher area coverage is reported from MP in recent years.

Indian wheat is largely a soft/medium hard, medium protein, white bread wheat, somewhat similar to U.S. hard white wheat. Wheat grown in central and western India is typically hard, with high protein and high gluten content. India also produces around 1.0-1.2 million tons of durum wheat, mostly in the state of Madhya Pradesh. Most Indian durum is not marketed separately due to segregation problems in the market yards. However, some quantities are purchased by the private trade at a price premium, mainly for processing of higher value/branded products.

**AGRO SHREY PRESENCE:** "MADHYA PRADESH" THE HIGHEST AND THE BEST WHEAT PRODUCING STATE IN INDIA. WE HAVE OUR OWN SETUP HERE A MANUFACTURING UNIT FOR PRODUCING WHEAT FLOUR AND REFINED WHEAT FLOUR.

**Types of wheat** – Sharbati, Lokwan, Mill Quality, 303,1544, Malavraj and others.

## Plant details:-

- MILL PLANT** – We have 8 ROLL BODY with latest technology & all following FSSAI norms. AND its FULLY Automatically & Make by I-MASS turkey based plant. Per Day capacity of this plant is 200MT. Products are MAIDA, SUJI, RAWA, TANDOORI ATTA, FINE BRAN & COURSE BRAN.
- CHAKKI PLANT**:- Having 8 CHAKKI of BANSAL's make plant, its also fully automatic plant. Per day capacity is 100MT. Products are WHOLE WHEAT CHAKKI ATTA, DALIA and CHAKKI BRAN. We are using LOKWAN wheat for CHAKKI ATTA.
- BESAN PLANT**:- Its also fully automatic plant of BANSAL's make.

We are attaching all parameters of all PRODUCTS:-

**MILLETS:** India is proud and honoured to be at the forefront of popularizing Millets. Millet consumption furthers nutrition, food security and welfare of the farmers.

We at AGRO SHREY proudly associate with the govt initiative to promote millets in the world and make every person healthy.

**AGRO SHREY PRESENCE-** Madhya Pradesh, Uttar Pradesh, Chattisgarh, Rajasthan and South India (Highest millet producing states in India)

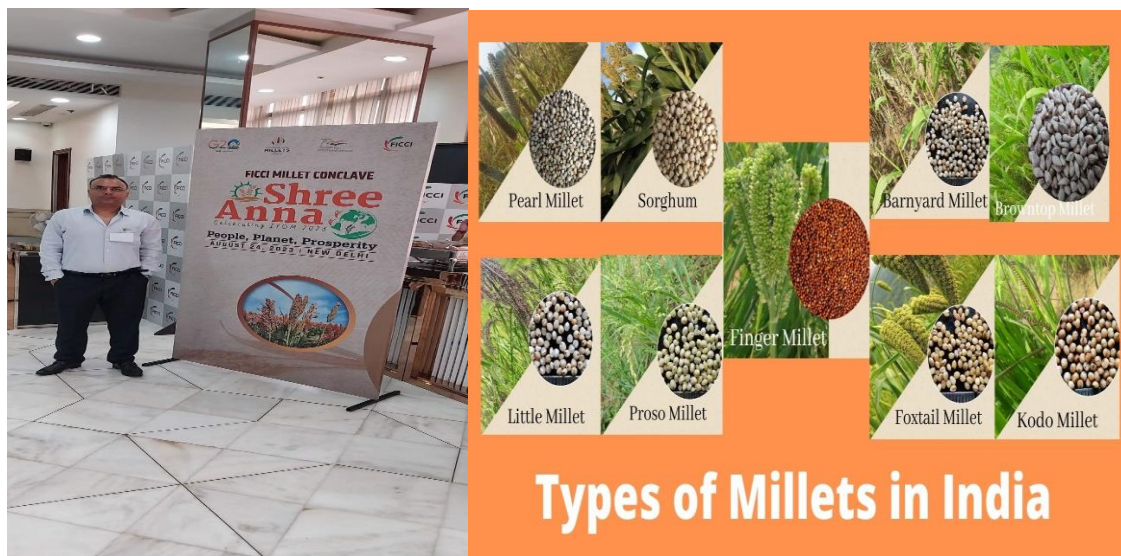

India and the whole world celebrate 2023 as the millet year. Millets have been an integral part of our diet for centuries. In addition to a plethora of health benefits, millets are also good for the environment with low water & input requirement. With the aim to create awareness and increase production & consumption of millets, United Nations, at the behest of the Government of India, declared 2023 the International Year Millets. To commemorate this, MyGov is hosting various interactive activities around Millets.

**Types of Millets:**

## AGRO SHREY GLOBAL IMPEX COMPANY

1. Ragi (Finger Millet) Extensively grown in the dry areas of India, especially South India and is a staple for rural population. It contains high amount of calcium, proteins, phosphorous and vitamins. Beneficial for high blood pressure, constipation, Cancer and diabetics.
2. Bajra (Pearl Millet) is gluten free and retains its alkaline properties even after being cooked. Grains have high protein content, balanced amino acid profile and high levels of iron, zinc and insoluble dietary fiber.
3. Proso Millet is an important millet grown in India. It is able to evade drought by being a short duration crop with relatively low water requirements. Prevents breast cancer, good for women health, reduce the risk of heart disease, completely gluten free and has significant amount of carbohydrates and fatty acids.
4. Kodo Regular consumption of “Kodo” millet is beneficial for postmenopausal women suffering from signs of cardiovascular diseases like high blood pressure and high cholesterol levels. Very High Protein Content (11%), Low fat content (4.2%) and very high fibre content (14.3%). It is easy to digest and excellent for strengthening the nervous system.
5. Jowar (Sorghum) is one of the most energy efficient crops in the use of solar energy and water to produce food and biomass. It has an inherent drought tolerant nature and can be grown in a wide range of environmental conditions. It is worlds 5<sup>th</sup> major cereal food crop in terms of production and acreage.
6. Foxtail Millet- rich in dietary fibres, minerals and micronutrients, protein and has low glycemic index (GI). A potent energy source for pregnant and lactating women. Ranks 2<sup>nd</sup> among millet production in the world.
7. Other Millets are little millet and Barnyard.

**Indian Spices:** India is the leading exporter of spices and Spice Item in the world. red chillis, cumin, coriander, turmeric, fennel, fenugreek, cardamom, mustard, ginger, and black pepper\_Indian spices are very good in aroma and natural.

MUSTARD HONEY: Agro Shrey Presence in Gwalior and Morena Madhya Pradesh makes us one of the best suppliers of Natural Mustard honey because Madhya Pradesh is rich in forest and Morena is famous for Mustard seeds and flowers not only in India but the world.

# AGRO SHREY GLOBAL IMPEX COMPANY

---

Mustard raw honey is a pure, unprocessed honey made from the nectar of mustard flowers. Mustard honey is high in natural glucose and therefore is normally in semi or fully crystallized state. The raw mustard honey tastes sweeter than most honey varieties. The flavour is rich and sharp. Raw mustard honey has higher moisture content and that combined with the enzymes and yeast present in the honey reacts to warm environments. This makes the raw mustard honey an ideal choice for people who want to enjoy pure, unprocessed honey without having to worry about it going bad quickly. Mustard Honey also has a host of health benefits that make it a great addition to any diet.

Some of the benefits of mustard honey include:

- Antioxidants that help fight free radicals and boost the immune system.
- Minerals like zinc, potassium, calcium and magnesium that are essential for good health.
- Enzymes that aid in digestion and help the body absorb nutrients from other foods.
- Yeast that helps balance gut flora and improve gut health.
- Boosting the immune system.
- Reducing inflammation.
- Helping with digestion.
- Providing energy.
- Supporting weight loss goals.
- Fighting infection.

All of these benefits make raw mustard honey a great choice for people looking for a pure, unprocessed honey with added health benefits. Give it a try today!

Mustard Raw Honey is a unique and delicious honey that is gaining popularity. It has a strong, spicy flavor that can add a kick to many dishes. This honey is also quite healthy, providing numerous nutritional benefits. If you are looking for a new and interesting honey to try, Mustard Raw Honey is definitely worth checking out!

Mustard raw honey has been gaining popularity due to its unique and delicious flavor. This honey is made from the nectar of wild Mustard flowers and has a strong, spicy flavor. It can add a kick to many dishes and is quite healthy too.

**Makhana (Fox Nut):** Makhana (Foxnut), also known as Gorgon Nut, is grown in India, Korea, Japan and Russia. It comes from the lotus seeds. Foxnut (Makhana) can be mixed with vegetables, popped like corn and made into yummy porridge. Makhana has been proven to be high nutrients food which is rich in medicinal properties and good for daily health diet. The nutrients contained are vitamin, minerals and fibers. Makhana is a high value commodity commercially cultivated only in Bihar and certain parts of eastern India. Besides this, it is grown as a natural crop in Madhya Pradesh, Rajasthan, Jammu & Kashmir, Tripura and Manipur.

**Types of Foxnuts and Sizes:** 3 Suta, 4 suta, 4 suta handpicked, 5 suta, 5suta handpicked, 5 Suta Plus, 5 suta Plus handpicked & 6 Suta handpicked (1 suta= 3.175 MM)

**AGRO SHREY -** We work directly with the manufacturers in Bihar.

India is the largest exporter of Makhana in the world. The Makhana market will grow at a CAGR of almost 7% during the forecast period of 2019-2023. The global Makhana market size will grow by USD 72.5 million during 2019-2023. The demand for Fox nut is increasing and is considered as a substitute for popcorn.

INDIA — Bihar produces 90% of the world production of fox nut. It has been adapted to the tropical climate of India and is found in natural, wild forms in various parts of north-east India and scattered pockets of central and northern India.

**SESAME Seeds(TIL)**

# AGRO SHREY GLOBAL IMPEX COMPANY

Sesame [Agro Shrey](#) deals in the Sesame Seeds from Madhya Pradesh a leading Sesame seeds Producing state in India and the world.

(*Sesamum indicum*), often known as Til, is a flowering plant in the *Sesamum* genus. It is farmed for its edible seeds, which are produced in pods, and has become widely naturalized in tropical locations around the world. India is the top Exporter of Sesame seeds in the world. The cultivated type, *S. indicum*, is from India.

It thrives in drought-stricken areas, where other crops have failed. Sesame seed, which dates back over 3000 years, is one of the earliest domesticated oilseed crops. The oil content of sesame is among the greatest of any seed. It is a common component in cuisines across the world because of its rich, nutty flavour.
